AMENDMENTS IN THE CLAIMS:

1-34. (Canceled)

A structure comprising a bond formed between an (Previously Presented) 35. optical fibre and a metallic element with a glass fixative, the bond having been formed by positioning a glass preform adjacent the optical fibre and the metallic element and inducing current flows in the metallic element to generate sufficient heat to melt the perform, wherein the glass fixative composition includes all of the following: PbO; PbF₂; Nb_2O_5 ; CuO; Bi_2O_3 ; Fe_2O_3 ; ZnO; TiO_2 ; Al_2O_3 ; B_2O_3 ; SiO_2 ; and CaO.

RENNER OTTO 20

A structure comprising a bond formed between an (Previously Presented) 36. optical fibre and a metallic element with a glass fixative, the bond having been formed by positioning a glass preform adjacent the optical fibre and the metallic element and inducing current flows in the metallic element to generate sufficient heat to melt the preform, wherein the glass fixative composition includes the following constituents in the following proportions:

PbO 60%wt to 65%wt; PbF2 2%wt to 5%wt; Nb2O5 2%wt to 5%wt; CuO 0.5%wt to 1.5%wt; $\mathrm{Bi_2O_3}$ 6%wt to 7%wt; $\mathrm{Fe_2O_3}$ 2%wt to 3%wt; ZnO 2%wt to 3%wt; $\mathrm{TiO_2}$ 5%wt to 7%wt; Al₂O₃ 0.1%wt to 0.3%wt; B₂O₃ 2%wt to 3%wt; SiO₂ 0.1%wt to 0.4%wt; CaO 1% to 1.5%wt.

(Canceled) 37-45.
